SUMMARY

Self-motivated and results driven with a passion for people. I bring the best possible combination of left and right brain skills, combining an extensive programming background with deep interpersonal skills to push myself and others to get results.

SKILLS

Full-Stack

- **AngularJS/Angular**, **Vue**, **React**, **RxJS**, **Redux**, **Vuex**, **Laravel**, **RESTful API**, **Express**, **MongoDB/MySQL/PostgreSQL**, **Grunt**, **Gulp**, **Webpack**, **Jasmine**, **TDD**.

SRE/DevOps

- **TravisCI/Jenkins**, **AWS**, **GCP**, **NPM/Nexus**, **Unix script**.

Languages

- **Javascript**, **Node.js**, **PHP**, **Java**, **Python**, **ANTLR**, **OCaml**.

Communication and Leadership

- Beta Theta Pi - Gamma Xi Chapter at the University of Florida
- Eagle Scout

EXPERIENCE

Software Engineer

OneTrust

Atlanta, GA

July 2019 - April 2020

- Owned and developed features on a product team in a fast-paced, high-pressure environment with turnaround of 2 weeks for putting new features in the hands of clients.
- Built and optimized a core UI library written in Angular/Typescript used by the entire frontend engineering team.
- Developed a Node.js micro-frontend architecture used to refactor the entire frontend application, optimizing performance, testing, and development.
- Improved internal tooling to enforce coding standards, automate testing, and optimize dependency management.

Cybersecurity Engineer

Thales eSecurity

Plantation, FL

June 2017 - August 2017

- Contributed to development of Thales eSecurity's flagship product.
- Owned development of a suite of in-house tools used to test security vulnerabilities as part of our CI/CD pipeline.

Full-Stack Software Engineer

Seize the Market

Remote

August 2016 - August 2017

- Developed several product features from the ground up using backend and frontend web technologies.
- Automated new-client onboarding and import/export of existing databases.
- Built and documented a standardized development environment to be used company-wide by developers.

Data Analyst Intern

Keller Williams Classic Realty

Orlando, FL

June 2015 - August 2015 & June 2016 - August 2016

- Developed automation tools used to manage company data (MySQL and Excel)
- Managed new agent training, organized office finances, performed data entry, and coordinated the office vendor fair.

EDUCATION

University of Florida

Bachelor of Computer Science Engineering w/ minor in Business Administration

Gainesville, FL

2014-2019

- GPA 3.4/4.0
- Deans List 2015 & 2016

PROJECTS

Swipemoji

Swift

iOS App

- Developed an iPhone keyboard capable of recognizing swiped gestures using industry standard Natural Language Processing algorithms.

TigerZone

OOP, C++

Simulated Board Game

- Simulated a complicated board game, adding network capabilities and a permutation-driven AI.

Newton Planner

Ionic Framework, Javascript, CSS, HTML, C++

Cross-Platform Mobile App

- Built a task management and planner app whose key feature was being able to query the University of Florida course API to populate homework assignments.

Internal

Laravel Framework, PHP, Javascript

Web Application

- Created a web application for tracking the extensive training program used by Keller Williams Classic Realty.
